MRI Study to Measure Brain Structure in PD

SEEKING INDIVIDUALS WITH PARKINSON'S DISEASE AND HEALTHY VOLUNTEERS FOR RESEARCH STUDIES

We are currently seeking individuals **diagnosed with Parkinson's disease** as well as **healthy volunteers** to participate in research studies on brain structure and connectivity in those with PD. Experiments will involve being scanned in a magnetic resonance imaging (MRI) machine. You will have to answer some questions to ensure that you are eligible to participate in research studies prior to scheduling your appointment. If you are interested in being involved or require more information, please contact the MacDonald Lab at **(519) 661-2111 ext. 80271** or email **pmacdonaldlab@gmail.com** regarding the **PD MRI Study**. You will be compensated for your time.

Please check that you meet ALL of the following criteria:

- Between 55 and 80 years of age
- **NO** history of another neurological or major psychiatric disorder (*if* Parkinson's patient)
- **NO** history of neurological or major psychiatric disorder (*if* healthy volunteer)
- **NO** requirement for prescribed medications that make you drowsy
- **NO** history of abusing alcohol, prescription, or street drugs
- **NOT** taking Aricept (Donepezil), Reminyl (Galantamine), Exelon (Rivastigmine), or Memantine (Exiba)

Research Participation
